

# Quality

In 1999 Asti Aircraft Services introduced a Quality System. This system was intended since the beginning as the expression of the capacity to continuously improve and develop the business, finding and activating strategies and internal coordination aimed to increase the company operational's flexibility and competitiveness.

The quality system key factors are:

- Material availability
- Respect of quality standards
- Supplies traceability
- Lasting Customer's satisfaction
- Improved attention to the needs
- Risk control
- Continuous improvement and efficiency
- Concrete commitment involving the whole staff
